

Rasayana and its use in cancer.

Rasayana is an exclusive concept stated in Ayurveda. Mode of action of this therapy is specific in increasing the life span, significant improvement in quality of life and prevention of disease. We, at Rasayu Cancer Clinic are using this specialty of Ayurveda in all types of cancer patients since more than 15 years. We have treated thousands of cancer patients using Rasayana therapy and documented evidences state that Rasayana therapy provides significant efficacy and safety in treating cancer patients.

Benefits of Rasayana in cancer patients.

- Easy Oral mode of drug administration.
- Reduces disease symptoms.
- Significantly improves patient's Quality of life.
- Helps in Tumor regression.
- Increases survival period in all types of cancer patients.
- Prevents the progression of disease.
- Significantly reduces the risk of relapse in cancer survivors.
- Shows very significant action in reducing the side effects of Chemotherapy/Radiotherapy.

What is Rasayana

- Rasayana is a specialized branch of Ayurveda which aims to make a person healthy, improve his quality of life, increase his life span and aids in reversal of ageing.
- In olden days Rasayana therapy was used by Rishimunis and Yogis for healthy longevity.
- Today several research studies on Rasayana have proved its efficacy in treating cancer patients.
- Our Rasayana formulations are bioprocessed nano complexes prepared using specially purified and processed precious metals and gems like Gold, Silver, Pearls and Diamonds.
- All the above compounds undergo scientifically validated standardized and patented processing which generates high quality formulations containing nano particles.
- These nano particles ensure fast action, high efficacy, excellent tolerability and safety.

Scientific documentation for evidence based cancer care

- Treated thousands of cancer patients using this approach.
- Efficacy of each patient is validated using modern diagnostic parameters like PET, CT, USG, cancer markers etc.
- Scientific documentation is practiced incorporating parameters suggested in guidelines of National Cancer Institute (NCI) of America.
- Our extensive database suggests that Rasayana therapy works equally well in patients taking this therapy with or without chemotherapy /Radiotherapy.

Our unique approach

- Each patient is examined in detail so as to get a clear idea about his disease on mental, physical and social levels.
- Each patient is treated as an independent entity considering all the above facts.
- Rather than concentrating only on cancerous cells we also aim to enhance immunity of normal cells thereby preventing risk of cancer progression and metastasis.
- Our medicines do not have any kind of toxic effect on cancerous or normal cells. Hence hazardous side effects as lowering of WBC count and Hemoglobin, hair loss, weight loss, pain, nausea, vomiting are NOT observed even in the least.
- Our Rasayana medicines enhance body's own immunity and induce natural death of the cancerous cells.
- This immunomodulation caused by Rasayana also significantly improves the capacity of patients undergoing chemotherapy or radiotherapy to fight against the side effects of the respective treatments.
- Along with Rasayana we also give personalized dietary advices and suggest suitable Yogic techniques and Pranayama to enhance quality of life in our patients.
- This personalized approach not only enhances the rate of healing, but also significantly reduces chances of relapse.

Effect of Rasayana on Quality of life in cancer patients

- Rasayana improves overall quality of life in all cancer patients.
- Patients are relieved of physical symptoms and their life becomes easier.
- Rasayana effectively reduces anxiety and depression in cancer patients.

- Rasayana helps patients to independently perform their day to day activities.

Research on Rasayana

- We have established a state of art research laboratory to conduct scientific studies on Rasayana and explore its potential.
- Scientists from different scientific fraternities are continuously working to explore the potential of Rasayana.
- We are conducting series of research studies on cell lines and animals.
- Effect of Rasayana is being studied in depth at molecular levels.

Safety of Rasayana

- Safety of our patients is of prime importance for us.
 - Our extensive database clearly demonstrates safety of Rasayana even in patients who have consumed our medicines for more than 5-6 years.
 - Our Rasayana drugs have been subjected to acute as well as chronic toxicity studies in animals and have been found to be absolutely safe.
 - Our studies have demonstrated that there is no interaction between our medicines and drugs from conventional therapies like chemotherapy, radiotherapy etc.
- Each patient is continuously monitored for safety at a regular interval of every 3 months.
